

A. Yes she owned an undivided one-ninth interest in about twenty acres of land, West of Middletown, fifteen acres of this land is described in "Exhibit A", worth about three hundred dollars and a lot of mountain land containing five acres, more or less, and worth about \$10.00, if any thing. it has always been with the 15 acres tract and considered a part of the homestead. The whole tract has been vacant and is grown up and worth very little.

5. Can this property be divided amongst the parties interested in it?

A. No. there are so many heirs that each one would not get more than a yard or so. It just could not be divided amongst so many, and a number of them are away and can not be located.

6. Who is the owner of the other interest in the 15 acre tract?

A. That was deeded to Mrs. Lola M. Summers, formerly Lola M. Gladhill in a settlement for the funeral expenses. Mrs. Gladhill owns eight-ninths of the property now and the heirs of Bertie Forrest own one-ninth.

To the general interrogatory?

That is all I guess.

William E. Gounkins
